"The attached proposed policy, which has been coordinated with and approved by the NFIB, was developed by the Security Committee to replace a 1966 version which has become a dead letter. It will provide guidance to Community agencies on what security measures they should take for foreign personnel who are accredited to those agencies for liaison or for work with them on an integrated basis. It would eliminate tasking on CIA to keep a central index of such personnel, and on Community agencies to certify to CIA the results of national agency checks on these persons. Efforts to make the old requirements work were unsuccessful. Little if anything seemed to be lost in consequence. The new policy will require Community agencies to list in CIA's central register all SCI accesses they grant or sponsor for foreign liaison personnel; to maintain their own indexes of all foreign personnel accredited to them; and to tell CIA and FBI about any adverse security data they learn about on such personnel."
